Planning features | next125 Frame with illumination and different verschiedenen organisational parts, trolley, equipment with TIP-ON, sink base unit with two part waste sorting

Description

The strong, robust radiance of the kitchen in oak elegant graphit grey is softened by the elegant lacquer in cobalt green. A shining contrast and also very practical: the recess panel shelf next125 Frame which stores spices, knives and everything a professional chef needs in a tidy manner. The kitchen is rounded off by a high-quality equipment with Teppanyaki or table extractor which transforms the space into a wokshop for demanding culinary pleasure.

next125 Trolley

Timelessly elegant design combined with multifunctionality and mobility: the next125 trolley. Available as a kitchen, serving or bar trolley, it can be adapted to a great variety of situations and needs and offers an aesthetic and intelligent answer to a modern lifestyle.

next125 Frame

Form follows function – the constructive next125 Frame combines flexible organisation, perfect ergonomics and atmospherical lighting into a unique kitchen experience. Six organisational elements can be combined and therefore allow customised individualisation.

Material description

NX 640 Wood front oak elegant, available in 6 wood decors

Genuine wood fronts in oak elegant and natural walnut with their discreet grain pattern spread a warm, contemporary aesthetics. With their neutral shades, the six different decors are ideal combination partners, for example for matt lacquers in bright colours. Because wood is a natural product, each front is unique in terms of grain pattern thus spreading a singular charm.

NX 510 Matt velvet lacquer front, available in 13 colours

The surfaces created by matt velvet lacquer are convincing from a visual and a haptic point of view and produced by a water based lacquer system with UV drying. This makes it possible to meet ecological demands and to assure high resistance. The lacquer is applied to a high-quality chip board with a special melamine coating and a thick edging on all four sides.
