

## DATA SHEET | UTILITY-ROOM

### DESCRIPTION

Ever since the kitchen has opened up and increasingly become the hub of the home, there has been the question of what to do with the things you need every day but don't want to see? Often, smart city apartments or new homes don't have a basement any more. Added to this: do people really want to go down into the basement any more today to do the washing, iron or fetch food?

This gave us the idea of the multifunctional utility room. By this, we don't mean a storage room but a perfectly planned work area for washing, keeping provisions and other items, recycling and preparing things.

A room that's pleasant to work in and geared entirely to suit the user's behaviour. This is where form follows function and provides clever solutions covering all aspects of housekeeping.

### MATERIAL DESCRIPTION

#### NOVA | LAMINATED FRONT, AVAILABLE IN 8 COLOURS

Durable fronts with high quality melamine resin coating.

Front thickness: 19 mm

## DATA SHEET | UTILITY-ROOM

### OPEN SHELF TALL UNIT FOR WASHING MACHINE AND/OR TUMBLE DRYER

Washing machine and tumble dryer can be stacked inside the tall unit: this creates space even in the smallest room.

**OPEN SHELF TALL UNIT WITH HANGING RAIL AND LAUNDRY HOLDER**  
Everything can be stored in a space-saving manner. The lower pull-out offers the possibility to dry small things and trousers. The metal shelf protects against moisture.

### TALL LAUNDRY SORTING UNIT

Due to the openings, laundry can be divided perfectly – according to degree or colour – and hidden behind the door.
